

Brainstorm & idea prioritization

For Smart farming - IoT enabled Smart farming Application

- 100+ publications in group work
- 15 years' experience
- 30+ people in our network

Read our Statement for Forest Extension

PROBLEM
Farmers are under pressure to produce more food and use less energy and water in the process. A remote monitoring and control system will help farmers deal effectively with these pressures.

Practicalize
Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.
